THE FACTS

STONEKOTE®-5100-BLACK

CONFIDENTIALITY NOTICE: These documents contain confidential information belonging to the sender who is legally privileged. The information is intended only for the use of the individual or entity this is being sent to. If you are not the intended recipient, you are hereby notified that any disclosure, copying, distribution or the taking of any action in reliance on the contents of this information is strictly prohibited.

DESCRIPTION:

STONEKOTE®-5100-Black is E.L. Stone's flagship fastener-class coating. The coating provides desirable hardness and abrasion resistance. It's low coefficient of friction along with medium chemical resistance combined with its smooth medium gloss finish make it a great coating for almost all general non-stick anti-gulling applications.

USES:

Fasteners, nuts, bolts, threaded cap-screws, latch plates, etc.

FDA STATUS:

This product does not conform with regulations governing use for direct food contact.

Guarantee of performance of applied coatings by E. L. Stone Company are neither implied nor expressed. E. L. Stone Company has no control over the myriad of possible service conditions (chemicals, temperatures, mixtures, etc.) E.L. Stone Company recommends that a test sample first be evaluated by the customer under conditions as close as possible to their intended service condition.
